

SMART INTEGRATED WAREHOUSE SOLUTION

Your business success is our priority. We can help you maximize space, plan for growth, manage throughput, and increase efficiencies. EAM of intralogistics specialists provide an end-to-end solution that delivers.

ENGINEERING PRODUCTS THAT EMBRACE SMARTER THINKING AND SAFER PROCESSES.

ABOUT US

Wrackler (Pvt) Ltd. is a service-oriented company with over 20 years of experience in storage solutions. Our aim to provide top-tier integrated storage services while building strong customer relationships based on trust and loyalty. Our partnerships with leading global companies ensure comprehensive solutions tailored to diverse needs. Our expert team works around the clock to empower clients to enhance profitability and stay competitive. Specialties include designing and implementing storage solutions.

OUR DEVELOPMENT JOURNEY

Since its inception two decades ago, Wrackler (Pvt) Ltd. has continuously evolved, growing from a nascent service provider into a renowned leader in integrated storage solutions. Our journey has been marked by a steadfast commitment to innovation and excellence, driven by a vision to deliver world-class storage services that consistently surpass client expectations. We've built enduring partnerships founded on trust and transparency, collaborating with global leaders to provide comprehensive, customized storage solutions. Our expert team leverages deep technical expertise and unwavering dedication to service excellence from conceptual design through to implementation. Today, Wrackler stands as a strategic partner, empowering clients to enhance operational efficiency, optimize space utilization, and boost profitability. We remain dedicated to shaping the future of storage alongside our valued clients and partners.

OUR BUSINESS PARTNER

 **DEXION**[®]
COMPLETE STORAGE SOLUTION

MiMA[®]
MATERIAL HANDLING EQUIPMENT

MORN LIFE
MAN-UP MACHINES

 **OKAGV**
欧铠机器人
AUTOMATIC GUIDED
SYSTEM

VMAX
DIESEL FORKLIFTS

INDUSTRIAL SYSTEMS

Industrial racking and storage solutions for distribution and material handling applications (manual and automated)

INTEGRATED DISTRIBUTION SYSTEMS

Management systems and integrated solutions for warehouse and distribution environments (automated systems and technology)

COMMERCIAL STORAGE SYSTEMS

Commercial office storage systems including items such as cabinets, shelving, lockers, and Compactus

TYPES OF RACKING

Selective Pallet Racking

Drive in Racking

Narrow Aisle Racking

Shuttle Racking

Mobile Racking

Double Deep Racking

ASRS Racking

Heavy Duty Cantilever Racking

PALLET HANDLING SYSTEMS

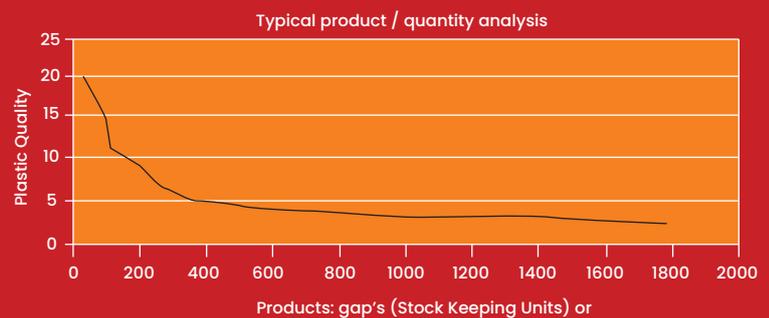

Dexion Keylock operates in conjunction with several key components. These are:

- Products – your boxes, packages, sacks, bottles, containers etc.
- People – your fork lift truck drivers, pickers, packers, operators, managers.
- Places – your warehouse, floor, walls, columns, lighting, sprinklers etc.
- Prime Movers – fork lift trucks, cranes, handling devices and attachments.
- Pallets – wooden, plastic, cardboard in every shape and size.
- Procedures – the storage, handling, picking, despatch processes.

All of these variable key components impact the environment where pallet storage systems form part or the whole of a storage solution. The storage and handling systems that are available are only limited by the imagination of the systems designer.

The table opposite compares the handling, space and density of each pallet storage system. The full range of Dexion Keylock systems are detailed in this book. Your Dexion representative will help assess your needs and work with you to develop a solution that will meet your specific requirements.

Key operating needs must be compared to the product profile that exists today within your business. The quickest and most time efficient method to review your products is to use a P-Q (Product/Quantity) Graph. Today's data will change in the future and this management tool enables you to prepare for this.

What material handling challenges are you facing?

"I have many SKUs."

"Individual pallet accessibility is critical"

"My pallet accessibility is Last in first Out based"

"My SKUs are stored long-term."

"I have few SKUs."

"My SKUs are densely packed."

"My storage facility requires high throughput."

"My Pallet accessibility is First in First Out based."

Scissor Lift

Single Bumper Pedestrian Barrier

Smart Guard

Warehouse Loading Trolley

Frame Protector

Foldable Stackable Cage

Spill Pallet

Wood Pallet

Plastic Pallet

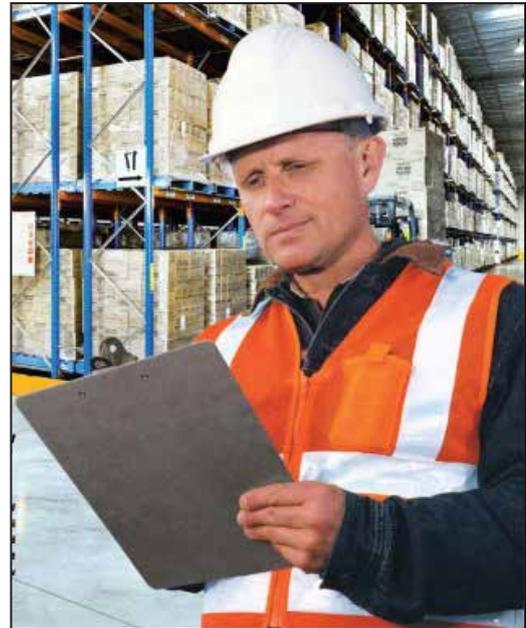

G.I. Pallet

MS Spill Pallet

RACK INSPECTION & SAFETY

We make it easy for your business to meet essential safety regulatory standards. Our Dexion approved rack inspectors can examine your installation, rack inspection and load test certificates including any adjustments that may be required for your warehouse operations.

OBLIGATION #1
ANNUAL INSPECTIONS.

Inspection of racking structure is carried out on a regular basis, at least once every 12 months. Dexion offer onsite rack inspection with on the spot reports.

OBLIGATION #2
RACK PROTECTION SYSTEMS.

Rack protection systems and wrap-around guards are required to protect the racking structure. Dexion has a range of protective devices which comply with the standard.

OBLIGATION #3
SAFE WORKING LOAD SIGNS.

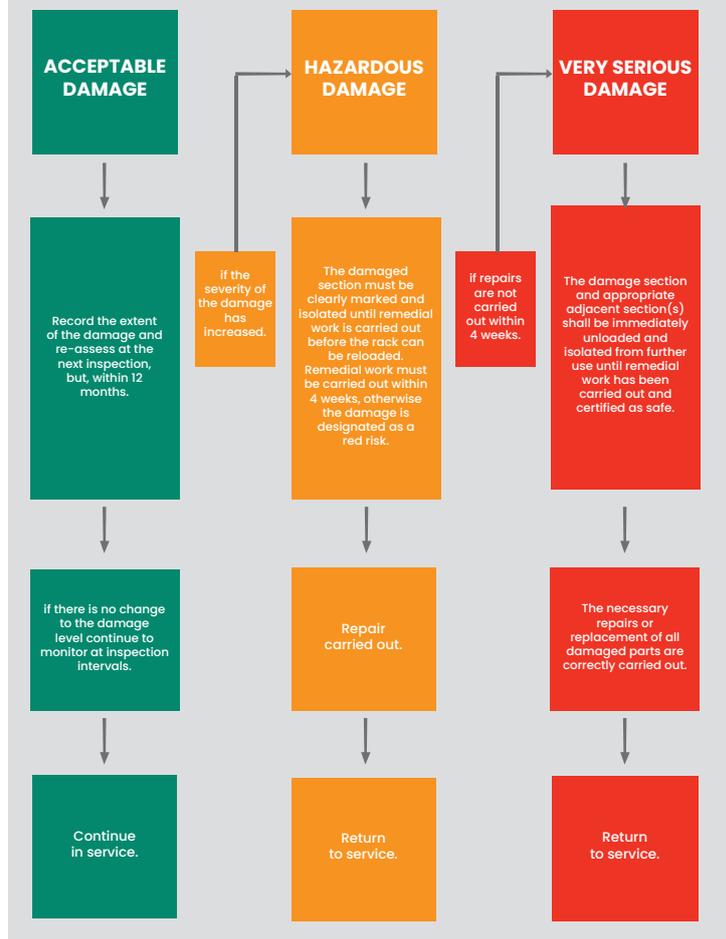

Racking installations shall have one or more safe working load signs in conspicuous locations. Dexion can assess your rack for maximum safe loading limits and provide the signs thereafter.

OBLIGATION #4
RACK SUPPLIER APPROVED ALTERATIONS.

Alterations to racking configurations are prohibited without the approval of the racking supplier. Dexion offers a reconfiguration and relocation service.

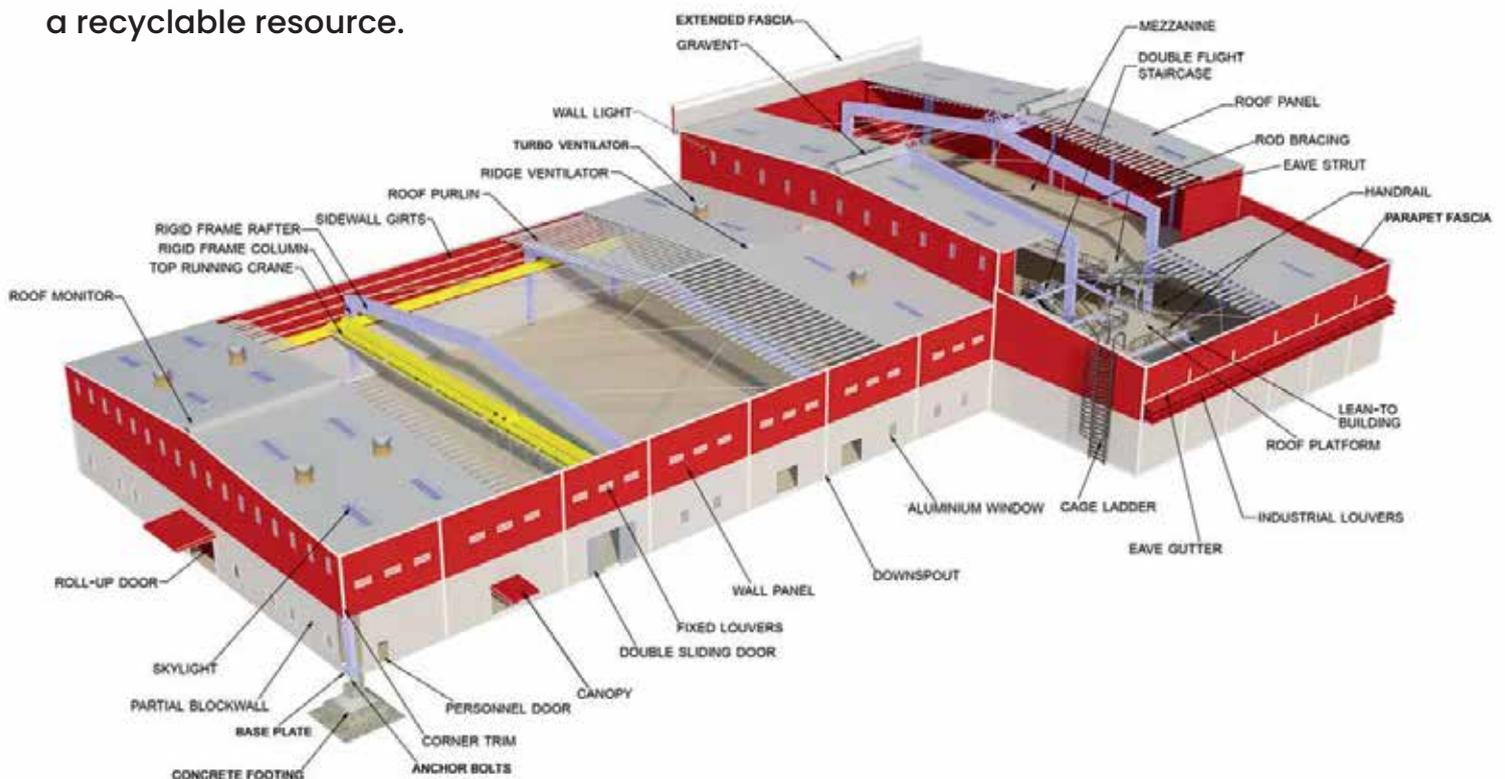

DAMAGE ASSESSMENT: AS4084: 2012 COMPLIANCE

PRE-ENGINEERED BUILDINGS

WHY CHOOSE PRE ENGINEERED BUILDINGS? & ADVANTAGES OF PEB CONSTRUCTION

Pre-engineered Buildings (PEBs) are a common option for construction projects for a variety of factors. **Cost-effectiveness:** Compared to conventional building techniques, PEB construction is typically more affordable. This is due to the fact that the components are manufactured in a factory, allowing for more productive production and lower labor costs. **Durability:** PEB structures are renowned for their longevity and durability. They are built to withstand harsh weather conditions and other difficulties using steel of the highest quality. **Versatility:** PEB structures can be altered to accommodate a project's unique requirements. This means that they can be applied to a variety of settings, such as warehouses, factories, offices, and more. **Faster construction:** PEB construction can be finished more rapidly than with conventional building techniques since the components are manufactured in a factory and then shipped to the site for assembly. This is especially advantageous for businesses that need to launch as soon as possible. **Sustainable:** PEB structures are a type of sustainable building. When a PEB building reaches the end of its useful life, it can be disassembled, recycled, or used again. Steel is a recyclable resource.
